Leadership in Organizations

Often it means that people place a spotlight on leaders and disregard the probability that the success of the organization lies somewhere in the followers. However, literature on leadership is often overlooked and research on it ignored. As organizations rapidly change, it is essential to understand organizational change through simultaneous discussions of both leaders and followers and the roles they play in the ultimate success of the company. Leadership and Followership in an Organizational Change Context is a pivotal resource that establishes the concept and definitions of leadership and followership in the context of organizational change and discusses the leadership and followership styles that can contribute to organizational effectiveness.
